SKILLS

- **Languages**: Java, C, C++, Python, and SQL.
- **Frameworks**: Pandas, NumPy, Matplotlib, Seaborn and Scikit-learn.
- **Tools/Platforms**: VS Code, Microsoft Excel, Power BI, Canva, Git and GitHub
- **Soft Skills**: Time Management, Problem-Solving, Leadership, Adaptability

PROJECTS

Secure File Manager – Python (Desktop Application): GitHub — Nov 2025-Dec 2025

- Developed a secure desktop file management system implementing AES-256 end-to-end encryption, ensuring 100% encryption coverage and eliminating plaintext file storage.
- Enabled multiple secure file operations (encrypt, decrypt, organize, rename, delete) within a single GUI, improving operational efficiency by 45%.
- Ensured file integrity and reliability by validating encryption/decryption accuracy across large files (up to several MBs) without data loss.
- Built an intuitive Tkinter-based GUI, allowing users to complete all core actions in under 3 clicks, significantly enhancing usability.
- **Tech**: Python, Tkinter, Cryptography, File Handling, GUI Development

E-Commerce SalesAnalysisDashboard: GitHub — Mar 2025-Apr 2025

- Designed interactiveTableauvisualizations from50K+transactional records, revealing revenue drivers, growth trends, and regional performance gaps.
- Delivered client-ready analytics views with custom branding through domain mapping, SSL enablement, and CNAME routing for secure access.
- Streamlined insightdeliveryby enablingreal-time datarefresh,reducing manual analysis workload by 60%.
  Tech: Tableau, SAP, DNS, SSL Certification, CNAME.

Air PollutionAnalysisOn Uttar Pradesh Dataset – DataScience Project: GitHub — Oct 2024-Nov 2024

- Examined multi-year environmental datasets (100K+ rows) across 20+ urban locations covering PM2.5, PM10, SO_2, and NO_2.
- Conducted statistical exploration and visual pattern discovery to highlight seasonal AQI fluctuations and hotspots.
- Constructed forecasting models (~85% precision) to support proactive air-quality assessment.
  Tech : Python, Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning, EDA, Machine Learning

TRAINING

Data Structures&AlgorithmsTraining - CiperSchools — Jul 2025

- Developed a secure Python-based desktop file manager using Tkinter, enabling users to encrypt, decrypt, organize, and manage files through an intuitive GUI.
- Implemented AES-based encryption, user authentication, metadata viewing, and permission-controlled access to ensure secure and reliable file handling.

CERTIFICATES

- Java Programming| iamneo — May 2025
- Certified in Cloud Computing | NPTEL — Apr 2025
- CPP Programming | iamneo — Dec 2024
- Data Structure and Algorithm | iamneo — Dec 2024
- Fundamentals of Network Communication | Coursera — Apr 2024

ACHIEVEMENTS

Kaggle– 1 YearBadge (Data Science Community): — Mar 2025

- Completed 1 year on Kaggle, consistently working on datasets, notebooks, and ML practice to strengthen real-world data science skills.

Participated in"Code-A-Haunt" 24-hour Hackathon(LPU) — Mar 2024

- Demonstrated strong coding, problem-solving, and teamwork skills during the 24-hour hackathon organized by Coding Blocks LPU

EDUCATION

Lovely Professional University — Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; • **CGPA: 5.81** — Aug 2023-Present

B BSinghInter College — Jaunpur, Uttar Pradesh
Intermediate; **Percentage: 80.6** — Mar 2020-Apr 2021

B N M P High School — Jaunpur, Uttar Pradesh
Matriculation; **Percentage: 83.6** — Apr 2018-Mar 2019
